

Beginning with Habitat (BwH)
equips Maine communities, landowners, and
conservation partners with tools to protect, restore, and
connect important habitats and ecosystems in a
changing climate.

Atlantic Salmon
Habitat

Stream reaches predicted to contain Atlantic
Salmon within watersheds that have been
classified as critical habitat under the
Endangered Species Act for the Gulf of Maine
Atlantic Salmon Distinct Population Segment

Alewife

Stream Access

Shellfish Growing
Areas

Distributions of molluscan shellfish species.

Wetlands

National Wetlands Inventory (NWI) uses
aerial photographs to approximate wetland
locations. NWI data typically under represents
the presence of wetlands on the landscape.

Shoreland Areas

Areas are delineated by ME Dep. of
Environmental Protection's Mandatory
Shoreland Zoning Act, which includes areas
within 250 feet of great ponds, rivers, and
wetlands, and within 75 feet of streams. The
regulations within each shoreland zone
depends on the town, and towns may regulate
greater areas than what is shown here. For
more information, please visit:
